SUMMARY

Data Engineer in cloud analytics with foundational full stack experience and strong problem solving focus. Architected an AWS solution provisioning EC2 and S3 static hosting, achieving 99.5% uptime for 150 concurrent users, and built a CI/CD pipeline with Python based tests that cut regression defects by 40% while improving data processing reliability. Combines Python, SQL, and cloud management with meticulous, collaborative attention to detail.

SKILLS

Programming & Core Concepts: Python, Data Structures & Algorithms (DSA), CRUD operations, MVC architecture, SDLC Principles

Web Development: HTML, CSS, Bootstrap, RESTful Services, UI/UX, Design Thinking

Cloud & DevOps: AWS (EC2, S3), GitHub Actions, CI/CD, DevOps, Testing Automation, Oracle Cloud Infrastructure (OCI Resource Manager, OCI IAM), Cloud Architectures, Cloud Resource Management, Automation Tools (Oracle Cloud), Network Configurations, Monitoring, Troubleshooting, Identity Management, Databricks SQL, PySpark, Workflows, Property & Casualty Insurance

Databases & Data: SQL, Database Management

IoT & Embedded Systems: IoT, Embedded Systems, Sensors, GPS, Microcontrollers, Sensor Data Processing

AI & Machine Learning: PyTorch, Generative AI

Hardware Design: Verilog, System Verilog, RTL understanding, Temporal logic assertions, Formal verification methodologies, Digital design, Hardware description languages

Methodologies: Agile, Microservices, Distributed Computing

EXPERIENCE

Frontend Development Intern

Jun 2024 – Aug 2024

Narasaraopeta Institute of Technology

Narasaraopet

- Engineered a full stack web solution on AWS, provisioning EC2 and S3 static hosting for a responsive HTML/CSS/Bootstrap UI, achieving 99.5% uptime for 150 concurrent users.
- Designed UI/UX through design thinking workshops, prototyping interactive components that coordinated front end logic with RESTful services, reducing user task time by 30%.
- Designed automated workflows with GitHub Actions that orchestrated Python unit/integration testing and OCI Resource Manager deployments, streamlining CI/CD and cutting regression defects by 40% while ensuring secure code reviews.
- Led Agile sprint ceremonies for a five member team, defining OCI IAM roles and policies to enforce least privilege access and coordinating cross domain integration of front end and IoT back end services, delivering three releases each month.

IoT Intern

Jun 2023 – Jul 2023

Narasaraopeta Institute of Technology

Narasaraopeta

- Developed a monitoring application using sensor data processing and embedded system integration.
- Integrated sensors with microcontrollers to detect abnormal driving conditions and trigger alerts.
- Tested and debugged the system to ensure reliable real time monitoring and performance.

PROJECTS

Driver Safety Analysis with Accident Detection Using WSN

Nov 2024 – Present

- Developed a monitoring application using sensor data processing and embedded system integration.
- Integrated sensors with micro controllers to detect abnormal driving conditions and trigger alerts.
- Tested and debugged the system to ensure reliable real time monitoring and performance.

Student Management System

Mar 2026 – Present

- Developed Python application with CRUD operations.
- Designed MVC architecture with integrated database for scalable performance.
- Performed testing, debugging, and validation following SDLC principles.

EDUCATION

Narasaraopeta Institute of Technology

Narasaraopet

Bachelor of Technology – Electronics and Communication Engineering

Aug 2022 – May 2025

Sai Tirumala NVR Engineering College

Narasaraopeta

Diploma in Electronics and Communication Engineering

Jun 2019 – Jun 2022

- 6.66 CGPA

ZP High School

Endugumpalem

- 8.5 CGPA

CERTIFICATIONS

- Programming Foundations with Python
- Introduction to Databases (SQL)
- Build Your Own Responsive Website
- Build Your Own Static Website
- AWS Workshop Completion Certificate
- Generative AI Workshop Completion

LANGUAGES

- Telugu: Native
- Hindi: Intermediate
- English: Professional
- Urdu: Intermediate
